

Truex Lighting™

INDUSTRIAL STRIP FIXTURE WITH WHITE STEEL REFLECTOR MODEL NO. - IS14-2T8-W

4 FT., 2-LAMP, T8, INDUSTRIAL STRIP FIXTURE WITH WHITE REFLECTOR

Intended Use

Commonly used in commercial, industrial, or retail applications that require medium to high light levels.

Construction

Heavy duty industrial channel made of die embossed steel for optimal strength. Fixture includes welded end-plates with knockouts for individual or row mounting. Rotary lock lamp holders are used to ensure contact and security of the lamps.

Reflector

Standard 7" white steel reflector attaches easily with tool-less ¼ turn latch.

Finish

All steel parts are white powder coated post manufacturing to ensure smooth edges.

Ballast

Energy efficient, 120-277 multi-volt, electronic, automatic resetting, T8 ballasts are standard in all fixtures.

Approximate Fixture Dimensions

LENGTH: 48.5"

WIDTH: 7.0"

HEIGHT: 3.5"

Electrical

Energy efficient electronic, automatic resetting, high power factor, NBF, ballasts are standard in every fixture. Leviton rotary lock lamp holders are standard.
